

The Litios Light Crystals are relatively new to Canada, brand new to Toronto and not actually crystals. They are energetic products brought to us for the New Age as a result of channeling received by Antje Eisele. When I (Marilyn) first heard about them -- they were introduced to me by one of our members, I was skeptical, as I always am when I first hear about channeled materials and although I have not yet seen them I understand that these are beneficial items. In fact, they remind me somewhat of the BioGenesis products. I think you will really like them, they will help you support the new energies coming in. Litios is the name for the first crystal sphere that Archangel Metatron created at the beginning of time and creation. You will be able to see, feel and learn about them November 2012 in Toronto and Ottawa and Montreal.

NEW !! The Litios Light Crystals

Peter and Ursula Schnell have been working with the Litios Light Crystals for 5 years and brought them to North America from Europe for the first time the fall of 2011. They began their work in Atlantic Canada and the work has been well received by healers, therapists and spiritual centres. In November 2012 they will appear for the first time in Ontario for exhibitions, lectures and workshops.

The Litios Light Crystals are not crystals per se but rather they are energetic products. They are infused in a sacred space over a period of time by Archangels and Ascended Masters. How is this done? The founders are a couple who live in Southern Germany at the foot of the Swiss Alps and were instructed through their spiritual guidance exactly how to create these Litios Light Crystals.

All Litios Light Crystals help to harmonize and energize auras and rooms:

- * they harmonize water veins, harmful earth radiation, fault lines
- * they harmonize technical radiation, e.g., electrosmog ...
- * they energize water, food and beverages
- * they create a protective field of light in our aura or in rooms and buildings
- * they suffuse our aura and rooms with pure light energy

Dowzers could find that these crystals are very good at raising energies and clearing out detrimental energies with the help of the Angels associated with them.

As an example, regarding one of them, the Ashtar Sphere, Peter says that "When we work with the Ashtar Spheres, Ashtar and his Light Technicians work with us through the crystals and they have abilities that are quite astounding. We have done major clearings with their help which has been confirmed by experienced, sensitive people who know energy work. These crystals work up to the 7th dimension and higher, connecting you to the ascended master plane. The crystals also actively work with you, they open up to where you are at and rarely overburden or overtax someone, that is how the angels working through them adjust the energies so that you get what you need right now."

Nice to know, too, that they have worked with renowned BioDynamic farmer and Dowser Charles Hubbard from Nova Scotia. If you have joined our group in the past few years, you might not have heard of Charles, who spoke to us March 2005 on "BioDynamics And Dowsing". Charles is mentioned in our issues from time to time and we stay in touch with him. You can see our youtube interview with Charles on our YouTube web site, youtube.com/dowzersinfo where he told us about the "G". The booklet we compiled and published about his teachings to us at that time is available at our meetings. Camera teams from various networks typically visit him every fall to film his harvest – he averages 120-160 potatoes per single planted potato at the base of his pyramids, etc. Farmers throughout North America and now worldwide are consulting Charles for guidance.

Last June Peter and Ursula planted and initiated an "Evolutionary Wand" in the centre of the smaller labyrinth on Charles' farm together with Charles and a visiting group. This has further raised the energy of his farm as a whole and brought in additional spiritual components. The Evolutionary Wand has been infused with the Divine thought of primordial creation and connects us and our entire surroundings with this thought. It helps nature and its surroundings to reconnect to the original perfect divine blueprint, to remember the perfect, harmonious and natural state of being.

One of Charles' friends writes: "Shiminicas Rogation Centre is a special farm near Amherst, Nova Scotia, where farmer/dowser Charles Hubbard has created a living classroom on his farm. For over 5 years Charles has integrated ancient energy systems to grow food that is rich in energy and abundant in growth. Energy systems include labyrinth, earth energy circles and naturally occurring energy lines. In mid spring the Evolutionary Wand was installed in the center of the labyrinth. Since then I have visited the farm many times and have seen the evolution of the labyrinth take place. Immediately, the energy field of the labyrinth began to strengthen and become more dense/apparent, seeming to weave together in an organized fashion all the surrounding energies including cosmic connections. In the weeks that followed the farm energy systems began to respond to the energy forming and growing outward in the labyrinth. As all the systems were already linked together with energy lines, the response from the other sections of the farm was not a surprise; these energy connections allow the energy from the labyrinth to spread out easily to the different elements (human, spirit, animal, soil, plants) of the farm. I would say that the Evolutionary Wand has supported a significant shift and rise in vibration in an already high vibrating environment where even the sky is not a limit!"

You will be able to see the Litios Crystals at the Whole Life Expo in Toronto November 9 – 11 and they will be holding a workshop the following weekend November 17-18. Details TBA. Or, visit the Litios Canada site at www.Litios.ca. You can contact them under contact@Litios.ca and also sign up for their newsletter.

* * * * *

Peter, who was born in Toronto, has worked with quartz crystals for over 25 years and has built various devices with them. After he finished his electrical engineering degree, he moved to Europe and has worked in the telecommunications industry for most of his career. He has worked with the team around Marcel Vogel and has built precision transformational devices using Quartz Crystals. Energy and crystal work was an extension of his training in antennas and certainly more interesting! Ursula, born in Germany, has her doctorate in Biology and is quite familiar in both worlds of classical sciences as well as alternative methods. She is very intuitive and sees much through her connection with her spiritual guidance.

Their work with the Litios Light Crystals has accelerated their spiritual growth and has intensified their connection to the Higher Light Dimensions and to the Angels, both in their meditations as well as in daily life. The Litios Crystals brought a new and active spiritual component to their work. They are committed to doing their part to heal the earth and raise her energies and feel they can best do this by using the Litios Crystal Energies. *Thank you, R&R!*
